JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SWEDEN.—October 12. The government of Livland declared cholera-infected. The islands of Kånsö, near Gothenburg, and Jejan, near Stockholm, are designated as quarantine and observation stations; also Hälsingborg, Vastra, and Hästholmen, in the district of Kostroma; Slite, in Gottland; Arkö, in the district of East Gottland; Juniskären, near Sundsvall, and to October 17 Haron, in the district of Stockholm.

TURKEY.—September 29. Arrivals from the littoral between Batoom and Odessa, both places included, subject to five days' detention with disinfection. Persons from the region named are subject to five days' medical oversight at their places of destination. Pilgrim and other vessels from Russian ports of the Black Sea carrying more than one passenger per every 100 tons net, registered, shall be subject to special measures at the lazaretto of Sinope. Such vessels may, after compliance with said measures, pass the Straits of the Bosphorus and the Dardenelles in quarantine, in order to repair to the lazaretto of Abou-Saad (Jiddah). They are free to take provisions, water, and coal; also to embark other pilgrims, either at the lazaretto of Monastir-Aghzy (Kavak), Klazomena (Smyrna), or Beirut, under strict medical supervision. Emigrant vessels from ports of the Black Sea shall be subject to the same requirements as pilgrim vessels.

PLAGUE.

EGYPT.—October 3 and 6. Plague regulations against arrivals from Beirut and from the Arabian coast of the Red Sea, and from the port of Akaba to the port of Yemen, declared not in force.

TURKEY.—October 6. The strict medical oversight of arrivals from Beirut, previously ordered, discontinued.

ALGERIA.

Deratization at Algiers.

The following is taken from the *Bulletin Bimensuelle*, Algiers, October 16:

October 1 to 15: Rodents taken by the maritime sanitary service, 419; examined by the laboratory of health, 40; result negative. Classification of rats: *Mus norvegicus*, 337; *rattus*, 36; *alexandrinus*, 4; *musculus*, 42.

BARBADOS.

Report from Bridgetown—Inspection and fumigation of vessels—Case of smallpox from steamship Castillian Prince from Rio de Janeiro.

Acting Assistant Surgeon Urquhart reports, October 24:

Week ended October 24. Vessels inspected, 10; number fumigated, 3; total number of passengers, 23; members of crews, 350.

During the week 1 case of smallpox was removed from the steamship *Castillian Prince*, bound from Rio de Janeiro via Victoria to New Orleans. The case was taken to the quarantine station. The fore-castle and the other living compartments, and saloon were disinfected, and those of the crew who could not show a good scar were vaccinated by the port health officer. No quarantinable diseases were reported for the week for the port or island other than the case of smallpox mentioned.
